

Green River

- The Green River Workforce Investment Area (WIA) contains seven of Kentucky's 120 counties: Daviess, Hancock, Henderson, McLean, Ohio, Union, and Webster. See Page 3 for a map of the WIAs. Daviess and Henderson Counties are primarily urban. McLean and Ohio counties are for the most part rural and many of their residents commute to Daviess County. Henderson County imports workers from Union and Webster Counties, as well as Vanderburgh County, Indiana. Hancock County is 89% rural and is a net importer of labor, drawing nearly one-third of its workforce from Daviess County.
- In Green River
 - Over the past twenty years, 1980 through 2000, the population has grown by 4.2% to 207,377 persons versus 10.4% growth statewide.
 - Over the next twenty years, 2000 through 2020, the region is projected to grow by 4.4%, compared to 12.9% for the state (*Population Forecasts 2005-2030*, Kentucky Population Research, 2003).
 - 81.6% of the workforce-aged population (18-64) had a high school degree, including equivalent, or above in 2000. Green River ranked fourth among the Kentucky WIAs (Census 2000).
 - 12.9% of persons aged 18-64 had a Bachelor's Degree or above, ranking fifth in the Commonwealth (Census 2000).
 - Employment is expected to grow from 91,939 to 103,444 between 1994 and 2005, a gain of 12.5%. The greatest number of job openings will be in the Operating, Fabricating and Labor Occupations (578), followed closely by the Service Occupations (576) and the Professional, Paraprofessional and Technical Occupations (510) (*Green River Area Occupational Outlook to 2005*, Kentucky Department for Employment Services (DES)).
 - Compared to Kentucky:
 - Full-time hourly workers are more likely to be offered health insurance and retirement benefits, however salaried workers are less likely to be offered these benefits (*Kentucky Labor Supply and Demand Surveys*, 2002).
 - Labor market participation is higher (Census 2000).
 - Unemployment in April 2003 was higher (DES).
 - Underemployment is at the same level (*Kentucky Labor Supply and Demand Surveys*, 2002).
 - Poverty is lower (Census 2000).
- In two of the counties, over one-half of persons commuted to jobs outside the county in which they resided (Census 2000). In Daviess County, 86.2% of employed residents remained in the county to work.
- There are four post-secondary institutions in the Green River region: Henderson Community College, Owensboro Community and Technical College, Brescia College, and Kentucky Wesleyan College. Following is a list of the top majors for 2001/2002 graduates by institution and degree level. There are also a number of colleges located

within fifty miles of Green River, these include the University of Evansville and the University of Southern Indiana, which help train and supply the Green River workforce.

- Henderson Community College
 - Associate: Liberal Arts and Sciences – 44, Total – 124.
- Owensboro Community and Technical College
 - Associate: Liberal Arts and Sciences – 120, Total - 224.
- Brescia College
 - Associate: General Business – 9, Total – 12.
 - Baccalaureate: General Business – 25, Total – 124.
 - Master's: General Business Administration and Management – 12, Total 13.
- Kentucky Wesleyan College
 - Associate: Nursing – 1, Total – 1.
 - Baccalaureate: General Business – 17, Total 120.

Kentucky's Workforce Investment Areas (WIAs) and Area Development Districts (ADDs)

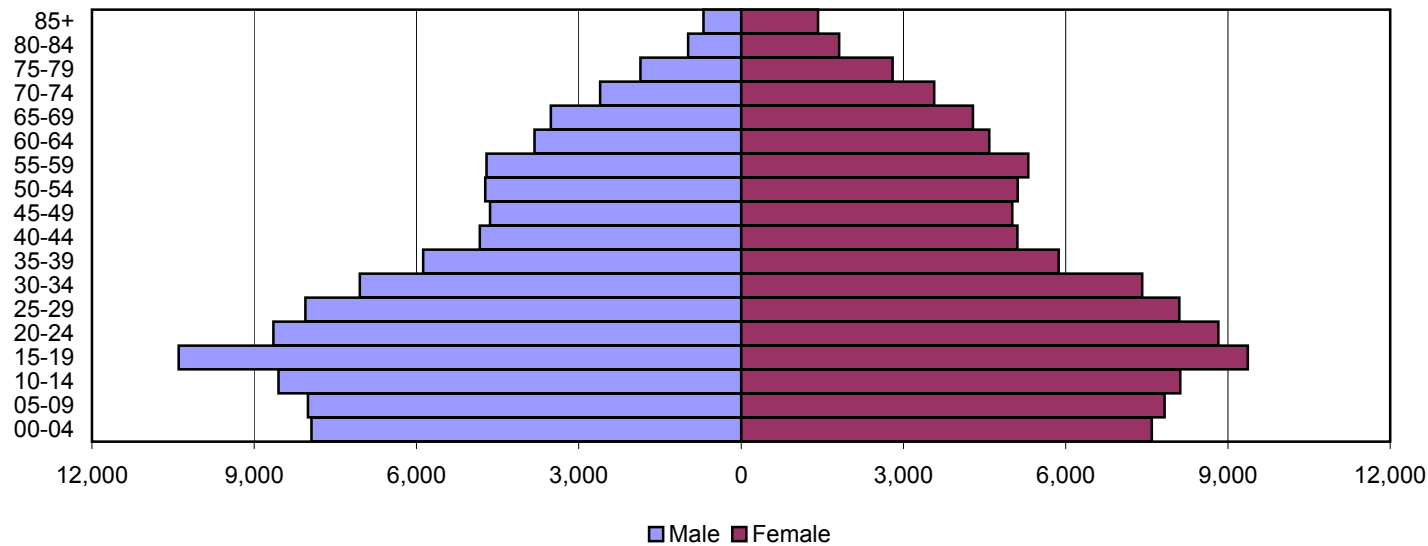

Population

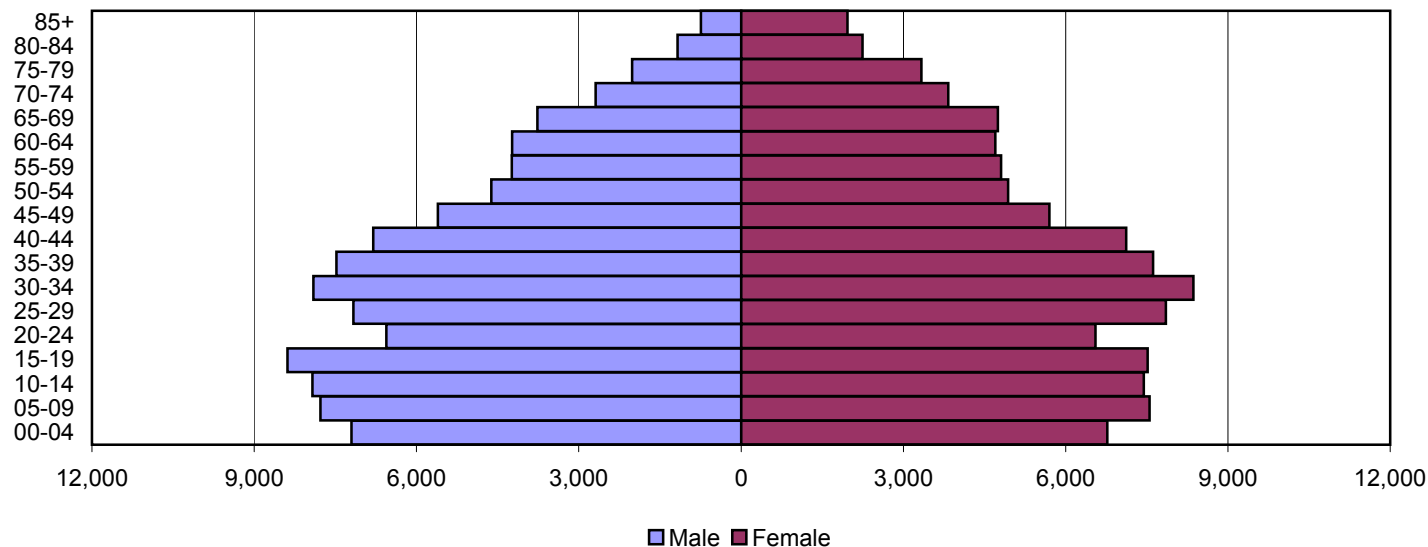

- The Green River WIA had a population of 199,048 in 1980. By 2000, the number of persons had grown by 4.2% to 207,377 (1980, 2000 Census). This growth was below average; Kentucky's population increased by 10.4% during this time period.
- Population forecasts developed in 2003 by Kentucky Population Research at the University of Louisville project that the region will experience 4.4% growth over the next twenty years, to 216,575 persons in 2020.
- Green River is not currently experiencing an aging of its population, but it is experiencing a middle-aging. In 1980, 11.8% of Green River residents were over the age of 65; in 2000, this had increased to 13.7%. Few persons turned 65 from 1995 through 2000 or will turn 65 from 2000 through 2010, as there was a birth dearth during the Great Depression and World War II, which began in 1929 and ended with the start of the Baby Boom in 1946. After 2010, Baby Boomers will start turning 65 and by 2020, 18.4% of the Green River WIA is projected to be 65 or older.
- Between 1900 and 2000, Kentucky's population nearly doubled from 2,147,174 to 4,041,769; however, the number of children 0-14 rose by only two percent, from 809,142 to 824,640, resulting in a fundamental change in the age structure of Kentucky's population.
- As the Baby Boom generation ages, Green River is moving from a pyramid-shaped population with many young and few old, to a squared population, where the largest population cohort will be 60-64 years old by 2020. Workforce and economic development agencies must focus on the retention and re-education of this older segment of the workforce to ensure continued economic growth.

Educational Attainment

- In 2000, Kentucky surpassed the national average for the percent of those aged 25-34 who had completed high school (84.2% vs. 83.9%). In Green River, 86.9% of those aged 25-34 had a high school degree or equivalent.
- In the Green River WIA, 81.5% of the workforce-aged population (18-64) had a high school degree, including equivalent, or above in 2000.
- 12.9% of Green River residents aged 18-64 had a Bachelor's Degree or above, compared to 16.7% of Kentuckians.

Kentucky	6.4%	14.6%	34.7%	22.2%	5.3%	10.4%	6.4%

- The percentage of persons with a high school degree is increasing in Green River. 86.9% of those aged 25-34 had a high school degree in 2000, while 54.3% of those aged 65+ had a high school degree or equivalent. (As the Census is taken in April, most 18 and some 19 year olds are still in, and thus, have not completed high school, which is reflected in the 72.8% of 18-24 year olds completing high school).
- Women in Kentucky are better-educated than men, though for those 45 and older men are more likely to have a Bachelor's Degree or above than women. The same is true for Green River. In the WIA, men over the age of 65 are also more likely to have a Graduate/Professional Degree than women 65 or older.
